Professional Summary

Computational biology Ph.D. candidate at Virginia Tech with a Master of Engineering in Computer Science and Applications, specializing in data analytics and artificial intelligence. Research experience spans deep learning, computer vision, vision-language models, genomics, microbiome analysis, and multimodal integration using complex biological and longitudinal datasets. Experienced in developing and evaluating computational methods for real-world biological and health-monitoring applications.

Education

Virginia Polytechnic Institute and State University

Blacksburg, VA, USA

Doctor of Philosophy (Ph.D.)

2022 -- 12/2026 (exp.)

- Genetics, Bioinformatics and Computational Biology
- School of Animal Sciences
- Dissertation: Integration of early dietary supplementation and automated feeding systems to mitigate postweaning slump in dairy heifers & Use of precision technology to predict pathogenic diarrhea in pre-weaned dairy heifers.
- Advisors: Dr. Rebecca Cockrum (Chair), Dr. Chris Thomas (Co-Chair), Dr. Gota Morota, Dr. Christina Petersson-Wolfe

Virginia Polytechnic Institute and State University

Blacksburg, VA, USA

Master of Engineering (M.Eng.)

2025 -- 2026

- Computer Science and Applications
- Department of Computer Science
- Concentration Area: Data Analytics and Artificial Intelligence

George Mason University

Fairfax, VA, USA

Master of Science (M.S.)

2019 -- 2021

- Bioinformatics and Computational Biology
- School of Systems Biology
- Project and Report (Non-thesis): Genomic and bioinformatic analyses of an ocular pathogen that molecularly types as a respiratory pathogen
- Advisor: Dr. Don Seto

University of Electronic Science and Technology of China, Zhongshan Institute

Zhongshan, Guangdong, China

Bachelor of Science (B.S.)

2013 -- 2017

- Biotechnology
- School of Materials Science and Food Engineering
- Exchange Student, Chinese Culture University, Taipei, Taiwan (2015 -- 2016)
- Capstone Project: Exploitation and development of natural pigments from black olives
- Advisor: Dr. Lin Li

Research Projects and Publications

AI and Computer Vision for Automated Calf Body Weight Prediction

- Developed an automated data collection system for depth-image acquisition
- Implemented CNN-based image segmentation for body-dimension extraction
- Conducted machine-learning modeling and longitudinal analysis for body weight prediction
- **Technical Skills:** Deep Learning/Machine Learning, Computer Vision, Automation (System/Camera)
- **Publication:**
 - Liao, M., Morota, G., Bi, Y., & Cockrum, R. (2025). Predicting Dairy Calf Body Weight from Depth Images Using Deep Learning (YOLOv8) and Threshold Segmentation with Cross-Validation and Longitudinal Analysis. *Animals*, 15(6), 868.

Whole-Genome Sequencing for Breed Differentiation in Sheep

- Performed variant discovery and filtering using whole-genome sequencing data
- Conducted population genetic analyses to identify breed-specific signatures
- Integrated functional annotations and QTL data to identify trait associations
- **Technical Skills:** Whole-Genome Sequencing, Variant Calling, Population Genetics
- **Publication:**
 - Liao, M., Kravitz, A., Haak, D., Cockrum, R. R., & Sriranganathan, N. (2026). Whole-Genome Sequencing Reveals Breed-Specific SNPs, Indels, and Signatures of Selection in Royal White and White Dorper Sheep. *Animals*, 16(5), 811.

Genetic Association Analysis of Ovine Johne's Disease

- Performed a genome-wide association study to identify SNPs associated with disease resistance
- Applied quality control, genotype imputation, and logistic regression for variant discovery
- **Technical Skills:** Genome-Wide Association Studies, Bioinformatics Pipelines
- **Publication:**
 - Kravitz, A., Liao, M., Morota, G., et al. (2024). Retrospective SNP Analysis of Host Resistance to Ovine Johne's Disease. *International Journal of Molecular Sciences*, 25(14), 7748.

Deep Learning for Diarrhea Detection in Dairy Calves

- Trained and fine-tuned deep-learning models for image-based diarrhea classification
- Benchmarked vision-language models under zero-shot and few-shot settings
- Built end-to-end pipelines for image preprocessing, model training, and evaluation
- **Technical Skills:** Computer Vision, Deep Learning, Vision-Language Models, Python (PyTorch)
- **Publication (Under Review):**
 - Liao, M., Atabuzzaman, M., Bowers, O., Thomas, C., & Cockrum, R. R. Benchmarking Large Vision-Language Models for Dairy Calf Diarrhea Identification.

Microbiome Effects of Early Lactose Supplementation in Dairy Calves

- Conducted longitudinal 16S rRNA microbiome analyses in dairy calves
- Integrated microbiome, growth, health, and feeding data for statistical modeling
- Performed diversity, community composition, and differential abundance analyses
- **Technical Skills:** Microbiome Analysis, 16S rRNA Sequencing, QIIME 2, R, and Statistical Modeling
- **Publication (Manuscript in Preparation):**
 - Liao, M., Bowers, O., & Cockrum, R. R. Early Lactose Supplementation and Longitudinal Microbiome Development in Dairy Calves.

Multimodal Prediction of Weaning Readiness and Diarrhea in Dairy Calves

- Integrated imaging, behavioral, health, and microbiome data for multimodal learning
- Built longitudinal pipelines for feature extraction and multimodal data fusion
- Developing predictive models for weaning readiness and early disease forecasting
- **Technical Skills:** Multimodal Learning, Computer Vision, Time-Series Analysis, and PyTorch
- **Status:** Ongoing project

Other Publications & Scholarly Work

- **Liao, M., & Cockrum, R. R.** Artificial Intelligence for Monitoring Health and Growth in Pre-Weaning Dairy Calves. Graduate Student Literature Review, *Journal of Dairy Science*. (Under Review).
- **Liao, M., & Cockrum, R. R.** (2024). Colostrum Management and Storage for Healthy Calves. *Virginia Cooperative Extension: Dairy Pipeline*, 45(7), DASC-171NP.

Professional Skills & Certificates

Computational & AI Skills: Machine Learning/Deep Learning (CNNs, transformers, transfer learning, regression, clustering), Computer Vision (image classification, object detection, segmentation), Vision-Language and Multimodal Models (Qwen3-VL, GPT, Claude, zero-shot and few-shot inference), Python (PyTorch, scikit-learn, data analysis), and R (statistical modeling, visualization)

Bioinformatics, Genomics & Experimental Skills: Next-Generation Sequencing (FastQC, MultiQC, Trimmomatic, BWA, VCFtools, BCFtools, SAMtools), Genome-Wide Association Studies (PLINK, Beagle, GEMMA), Variant Calling and Annotation (GATK, SnpEff), 16S rRNA Microbiome Analysis (QIIME 2), DNA extraction, serum processing, and animal sample collection

Research & Leadership Skills: Grant writing, scientific communication, interdisciplinary collaboration, and leadership of 20 undergraduate researchers across multiple research projects

Certification: Graduate Certificate in Data Analytics

Honors and Awards

2025	National Research Support Project (NRSP-8) fellowship grant, USA
2025	College of Agriculture and Life Sciences (CALS) travel award, USA
2024	2 nd Place Award in Poster Presentation (GPSS Research Symposium), USA
2024	Virginia Tech School of Animal Sciences Research Symposium Travel Award, USA
2023	Virginia Tech School of Animal Sciences Research Symposium Travel Award, USA
2023	John Lee Pratt Animal Nutrition Fellowship, USA
2022	John Lee Pratt Animal Nutrition Fellowship, USA
2016	2 nd Place Institutional Scholarship, China
2015	1 st Place Institutional Scholarship, China
2014	1 st Place Institutional Scholarship, China

Experience

Virginia Polytechnic Institute and State University

Research Assistant

Blacksburg, VA

2022 -- Present

- Designed and developed research projects in collaboration with principal investigators
- Conducted literature reviews, data collection, and analysis for research objectives
- Prepared IACUC protocols ensuring compliance with regulatory and ethical standards
- Implemented data management protocols and maintained accurate experimental records
- Participated in team meetings to brainstorm, troubleshoot, and evaluate outcomes
- Disseminated findings through presentations, reports, and scientific publications
- Collaborated with interdisciplinary teams to facilitate research and enhance outcomes

Virginia Polytechnic Institute and State University

Teaching Assistant

Blacksburg, VA
Fall 2026 (Incoming)

- Assist with neuroscience laboratory instruction and hands-on learning activities
- Present assigned instructional materials and support students during laboratory sessions
- Hold office hours, assist with grading, and provide academic support to students
- Support the instructor with course preparation and laboratory activities

Virginia Polytechnic Institute and State University

Project Team Leader

Blacksburg, VA
2023 -- 2025

- Led and supervised a team of undergraduate researchers for projects
- Oversaw recruitment, task assignment, and training initiatives
- Facilitated communication and collaboration within the team

Virginia Polytechnic Institute and State University

Teaching Assistant

Blacksburg, VA
Fall 2022 / Fall 2023 / Fall
2024 / Fall 2025

- Course: Animal Breeding and Genetics 3104
- Managed undergraduate teaching assistants and scheduled office hours.
- Addressed student questions related to coursework and assignments.
- Assisted the instructor with grading exams.

George Mason University

Graduate Researcher

Fairfax, VA
2020 -- 2021

- Project: Genomic and Bioinformatic Analyses of an Ocular Pathogen that Molecularly Types as a Respiratory Pathogen
- Analyzed a novel pathogen using bioinformatics workflows: BLAST, annotation, phylogenetic analysis, genome comparison, and recombination analysis
- Identified recombination events from known human adenoviruses, contributing to pathogen classification insights

University of Electronic Science and Technology of China, Zhongshan Institute

Undergraduate Researcher

Zhongshan, Guangdong, China
2016 -- 2017

- Capstone Project: Exploitation and Development of Natural Pigments from Black Olives
- Extracted polyphenols and anthocyanins from olive skin and pulp; optimized extraction conditions
- Assessed pigment stability under heat, oxidation, and reduction; evaluated effects of additives and metal ions

Presentations

Genetics, Bioinformatics and Computational Biology Seminar, Virginia Tech

Whole-Genome Sequencing Reveals Breed-Specific SNPs, Indels, and Signatures of Selection in Royal White and White Dorper Sheep (Oral Presentation)

Blacksburg, VA
2026**The Plant and Animal Genome Conference (PAG)**

Vision-Based Monitoring of Diarrhea in Pre-Weaning Dairy Calves (Invited Talk)

San Diego, CA
2026

Reproductive Biology Club, School of Animal Science, Virginia Tech Breed-Specific Genetic Variants and Selective Sweep Regions in Royal White and White Dorper Sheep Revealed Through Whole-Genome Sequencing (Oral Presentation)	Blacksburg, VA 2025
American Society of Animal Science (ASAS) Conference Genome-Wide Characterization of SNPs and Indels in Royal White and White Dorper Sheep Using Whole-Genome Sequencing (Oral Presentation)	Hollywood, FL 2025
Research Day, School of Animal Science, Virginia Tech Genome-Wide Characterization of SNPs and Indels in Royal White and White Dorper Sheep Using Whole-Genome Sequencing (Poster Presentation)	Blacksburg, VA 2025
Graduate and Professional Student Senate (GPSS) 41st Annual Research Symposium and Exposition Predicting Dairy Calf Body Weight from Depth Images Using Deep Learning (YOLOv8) and Threshold Segmentation with Cross-Validation and Longitudinal Analysis (Poster Presentation)	Blacksburg, VA 2025
Genetics, Bioinformatics and Computational Biology Seminar, Virginia Tech Predicting Dairy Calf Body Weight from Depth Images Using Deep Learning and Threshold Segmentation with Cross-Validation and Longitudinal Analysis (Oral Presentation)	Blacksburg, VA 2025
Center for Advanced Innovation in Agriculture Big Event Predicting Dairy Calf Body Weight from Depth Images Using Deep Learning and Threshold Segmentation with Cross-Validation and Longitudinal Analysis (Poster Presentation)	Blacksburg, VA 2025
The Plant and Animal Genome Conference (PAG) Comparison of Deep Learning and Threshold-Based Methods for Depth Image Segmentation Using Extreme Gradient Boosting to Predict Dairy Calf Body Weight (Poster Presentation)	San Diego, CA 2025
American Dairy Science Association (ADSA) Dietary Crude Protein is Independent of Rumen Microbial Community Ecology in Lactating Dairy Cows (Poster Presentation)	West Palm Beach, FL 2024
American Dairy Science Association (ADSA) Dairy Calf Health and Growth Monitoring Through Camera Phenotyping Techniques (Oral Presentation)	West Palm Beach, FL 2024
Research Day, School of Animal Science, Virginia Tech Camera-Based Monitoring of Dairy Calf Health and Growth: Phenotyping Techniques Applied (Oral Presentation)	Blacksburg, VA 2024

Dairy Science Seminar, Virginia Tech Colostrum Quality: Management and Storage for Healthy Calves (Oral Presentation)	Blacksburg, VA 2024
40th Annual Graduate and Professional Student Senate (GPSS) Research Symposium Dietary Crude Protein is Independent of Rumen Microbial Community Ecology in Lactating Dairy Cows (Poster Presentation)	Blacksburg, VA 2024
Center for Advanced Innovation in Agriculture Big Event Dairy Calf Health and Growth Monitoring Through Camera Phenotyping Techniques (Oral Presentation)	Blacksburg, VA 2024
Reproductive Biology Club, School of Animal Science, Virginia Tech Work in Progress: Dairy Calf Health and Performance -- Research Impact and Future Direction (Oral Presentation)	Blacksburg, VA 2024
Reproductive Biology Club, School of Animal Science, Virginia Tech Work in Progress: Unveiling the Mysteries of the Dairy Cow Rumen: Microbial Composition and Function (Oral Presentation)	Blacksburg, VA 2023
Research Day, School of Animal Science, Virginia Tech Shotgun Metatranscriptomics Reveals Functional Profiles of Rumen Microbial Ecosystem in Dairy Cows (Oral Presentation)	Blacksburg, VA 2023

Graduate Coursework

Ph.D. & M.Eng. (Virginia Tech):

- CS 5024 Ethics & Professionalism in Computer Science
- CS 5040 Intermediate Data Structures & Algorithms
- CS 5525 Data Analytics
- CS 5664 Social Media Analytics
- CS 5806 Machine Learning II
- CS 5814 Introduction to Deep Learning
- CS 5914 TS: Grad Course Design in CS
- CS 5934 Capstone Project
- CS 5984 Special Studies: Engineering Entrepreneurship
- ECE 5554 Computer Vision
- STAT 5615 Statistics in Research
- STS 5444 Issues in Bioethics
- GBCB 5874 Problem Solving in Genetics, Bioinformatics, and Computational Biology

M.S. (George Mason University):

- BINF 630 Bioinformatics Methods
- BINF 631 Molecular Cell Biology
- BINF 633 Molecular Biotechnology
- BINF 634 Bioinformatics Programming
- BINF 701 Systems Biology
- BINF 702 Biological Data Analysis
- BINF 731 Protein Structure Analysis
- BINF 739 Next-Generation Sequencing
- BINF 739 Computational Analysis of Viral Genomes
- BIOL 695 Coronavirus Research Update
